

73

The 73 Series valves are full-port ANSI class #150 flanged, floating-ball valves. These full-port valves provide higher flow rates (higher Cv) with minimal in-valve flow interference. Habonim's flanged valves are equipped with the Total HermetiX Integrity Package offering tight shutoff, zero-emission, double body sealing, fire-safe design, and long service life with high durability. Decades of exceptional performance in demanding applications under the most severe working conditions.
